

## FP012 Africa Hydromet Program - Strengthening Climate Resilience in Sub-Saharan Africa: Mali Country Project, Mali

---

*CSO comments on the project given as intervention during the 13<sup>th</sup> GCF Board Meeting, June 2016*

- Comments from civil society groups in Mali that we have been in contact with is a feedback that they are not aware of any wider consultation of civil society, and feel that there have to be avenues opened up through the project that allows them direct sustained engagement, for example with the executing national entities, such as the AEDD, as a prerequisite for successful project implementation.
